CONTENTS OF VOLUME 53

NUMBER 1, JANUARY, 1969

1 MICHAEL L. EVANS and PETER M. RAY. Timing of the auxin response in coleoptiles and its implications regarding auxin action

21 JON W. JACKLET. Electrophysiological organization of the eye of *Aplysia*

43 ANDRÉ B. BORLE. Kinetic analyses of calcium movements in HeLa cell cultures. I. Calcium influx

57 ANDRÉ B. BORLE. Kinetic analyses of calcium movements in HeLa cell cultures. II. Calcium efflux

70 MICHIKO OKAMOTO and WALTER F. RIKER, JR. Motor nerve terminals as the site of initial functional changes after denervation

81 TOSHIFUMI TAKENAKA and SHUNICHI YAMAGISHI. Morphology and electrophysiological properties of squid giant axons perfused intracellularly with protease solution

97 NICK SPERELAKIS and ACHILLES J. PAPPANO. Increase in P_{Na} and P_K of cultured heart cells produced by veratridine

115 S. F. TAKAGI, H. KITAMURA, K. IMAI, and H. TAKEUCHI. Further studies on the roles of sodium and potassium in the generation of the electroolfactogram. Effects of mono-, di-, and trivalent cations

NUMBER 2, FEBRUARY, 1969

133 THOMAS E. ANDREOLI, VINCENT W. DENNIS, and ANN M. WEIGL. The effect of amphotericin B on the water and nonelectrolyte permeability of thin lipid membranes

157 B. G. MUNCK and STANLEY G. SCHULTZ. Lysine transport across isolated rabbit ileum

183 A. A. AUERBACH and M. V. L. BENNETT. Chemically mediated transmission at a giant fiber synapse in the central nervous system of a vertebrate

211 A. A. AUERBACH and M. V. L. BENNETT. A rectifying electrotonic synapse in the central nervous system of a vertebrate

238 SEYMOUR ALPERT, MICHAEL MOSHER, ALAN SHANSKE, and IRWIN M. ARIAS. Multiplicity of hepatic excretory mechanisms for organic anions

248 S. D. STONEY, JR., and XENIA MACHNE. Mechanisms of accommodation in different types of frog neurons

NUMBER 3, MARCH, 1969

265 PETER W. GAGE and ROBERT S. EISENBERG. Capacitance of the surface and transverse tubular membrane of frog sartorius muscle fibers

279 ROBERT S. EISENBERG and PETER W. GAGE. Ionic conductances of the surface and transverse tubular membranes of frog sartorius fibers

298 PETER W. GAGE and ROBERT S. EISENBERG. Action potentials, afterpotentials, and excitation-contraction coupling in frog sartorius fibers without transverse tubules

311 ERIK J. OLSON and RALPH J. CAZORT. Active calcium and strontium transport in human erythrocyte ghosts

323 MICHAEL A. LANG and HAROLD GAINER. Volume control by muscle fibers of the blue crab. Volume readjustment in hypotonic salines

342 LEONARD BINSTOCK and HAROLD LECAR. Ammonium ion currents in the squid giant axon

362 ANDREW M. GOLDNER, STANLEY G. SCHULTZ, and PETER F. CURRAN. Sodium and sugar fluxes across the mucosal border of rabbit ileum

NUMBER 4, APRIL, 1969

385 G. D. MCCANN and J. C. DILL. Fundamental properties of intensity, form, and motion perception in the visual nervous systems of *Calliphora phaenicia* and *Musca domestica*

414 MARY E. CARSTEN. Role of calcium binding by sarcoplasmic reticulum in the contraction and relaxation of uterine smooth muscle

427 BARRY D. LINDLEY. Nerve stimulation and electrical properties of frog skin

450 AKIO SHIRAISHI and HIROMICHI MORITA. The effects of pH on the labellar sugar receptor of the fleshfly

471 T. HIDAKA and H. KURIYAMA. Responses of the smooth muscle membrane of guinea pig jejunum elicited by field stimulation

487 W. C. WISE and J. W. ARCHDEACON. Accumulation of iron in the rabbit erythroid cell as affected by ouabain, sodium and potassium ions, and temperature

498 A. L. POLITOFF, S. J. SOCOLAR, and W. R. LOEWENSTEIN. Permeability of a cell membrane junction. Dependence on energy metabolism

NUMBER 5, MAY, 1969

517 YUTAKA NAITOH. Control of the orientation of cilia by adenosine triphosphate, calcium, and zinc in glycerol-extracted *Paramecium caudatum*

530 H. A. FOZZARD and G. DOMINGUEZ. Effect of formaldehyde and glutaraldehyde on electrical properties of cardiac Purkinje fibers

541 BERNARD FULPIUS and FRITZ BAUMANN. Effects of sodium, potassium, and calcium ions on slow and spike potentials in single photoreceptor cells

562 JOHN DAVISON. Activation of the ephippial egg of *Daphnia pulex*

576 HOWARD KUTCHAI and NORMAN C. STAUB. Steady-state, hemoglobin-facilitated O_2 transport in human erythrocytes

590 P. M. CARROLL. The effect of hypertonic solution on the wet weight and contractions of rat uterus and vas deferens

608 K. KOKETSU and S. NISHI. Calcium and action potentials of bullfrog sympathetic ganglion cells

624 M. R. FEDDE. Electrical properties and acetylcholine sensitivity of singly and multiply innervated avian muscle fibers

638 ROBERT K. JOSEPHSON and MARTIN MACKLIN. Electrical properties of the body wall of *Hydra*

666 SHIZUKO IWASAKI and ERNST FLOREY. Inhibitory miniature potentials in the stretch receptor neurons of crayfish

NUMBER 6, JUNE, 1969

685 WILLIAM J. ADELMAN, JR., and YORAM PALTI. The influence of external potassium on the inactivation of sodium currents in the giant axon of the squid, *Loligo pealei*

704 L. J. MULLINS and F. J. BRINLEY, JR. Potassium fluxes in dialyzed squid axons

741 R. C. BEAN, W. C. SHEPHERD, H. CHAN, and JOELLEN EICHNER. Discrete conductance fluctuations in lipid bilayer protein membranes

758 A. L. KLEINHAUS and C. Y. KAO. Electrophysiological actions of oxytocin on the rabbit myometrium

781 A. WEBER. Parallel response of myofibrillar contraction and relaxation to four different nucleoside triphosphates

792 DON P. MACLEOD and K. PRASAD. Influence of glucose on the transmembrane action potential of papillary muscle. Effects of concentration, phlorizin and insulin, nonmetabolizable sugars, and stimulators of glycolysis

816 FEDERICO GARCÍA ROMEU, ALFREDO SALIBIÁN, and SILVIA PEZZANI-HERNÁNDEZ. The nature of the in vivo sodium and chloride uptake mechanisms through the epithelium of the Chilean frog, *Calyptocephalella gayi*. (Dum. et Bibr., 1841). Exchanges of hydrogen against sodium and of bicarbonate against chloride

836 LETTERS TO THE EDITOR

D. A. T. DICK. Osmotic behavior of hemoglobin in vivo and in vitro

839 INDEX TO VOLUME 53
